Try Pitch

**Accept Bitcoin for any \$RNTals**

**"IN LUV WE TRUST"**

# PROBLEM

- Traditional rent payments are often inconvenient, time-consuming, and costly, especially for tenants who may not have access to traditional banking services or who live in countries with unstable currencies.
- The cost of inflation is causing rental rates to surge out of the range of affordability for tenants.
- Rental middleman fees are cutting into hosts profit margin.

# SOLUTION

- Bitcoin \$RNT is a digital token that allows landlords and tenants to securely and easily accept and pay rent using Bitcoin, which is known for its security, transparency, and immutability.
- \$RNT offers several benefits to both landlords and tenants, including:
  - **Convenience:** Rent payments can be made and received instantly and securely, 24/7, from anywhere in the world.
  - **Cost-effectiveness:** \$RNT transactions have low fees compared to traditional payment methods, such as wire transfers or credit card payments.
  - **Transparency:** All transactions are recorded on the Bitcoin blockchain, providing a transparent and tamper-proof record of payments.
  - **Security:** Bitcoin is a secure and decentralized digital currency, making it a safe and reliable way to store and transfer funds.
